Stage 1: Property Inspection Services

Physical property inspection remains the primary source of risk management information gathered for Millennium clients. Millennium directs its qualified and experienced inspector network to measure, diagram, photograph and identify hazardous conditions of a property.

Our products cover the spectrum of home styles and values, even if your properties are in gated communities or weather-vulnerable coastal locales. Our experienced national field force is fully integrated with our platform, ensuring a quality product in a timely fashion. More than 95 percent of all inspections are processed within 30 days.
